

USING RELIABILITY INDEXES IN CHOOSING MAINTENANCE-TYPE. STRATEGIES

V. TOMA¹ V. MĂRĂSCU-KLEIN¹

Abstract: *This paper aims at determining the adequate maintenance type (corrective or preventive) to the operating state of an industrial production system during its different life stages. In the case of application of preventive maintenance, also replacing moments of worn component parts are evidenced.*

Key words: *reliability, lifetime, failure rate, maintenance, rate of wear.*
