COMPUTER ASSISTED TESTING OF KNOWLEDGE

Wilhelm LAURENZI[1]

Abstract: *The aim of any teaching process is a good accumulation of knowledge in every domain. Testing and evaluation of this knowledge represent an important activity in the teaching process. These activities could be realized subjectively in the classical way or objectively assisted by computer. In this aspect the presented programs are very useful in objective testing and evaluation of the accumulated knowledge and through adapting, the second program could be used for testing knowledge means of the Internet.*

Key words: *computer assisted knowledge testing.*
