

SOME STATISTICAL CONSIDERATIONS ABOUT THE ROMANIAN INTERNATIONAL TOURISM, DURING 1990-2003

L. DUGULEANĂ¹ C. DUGULEANĂ²

Abstract: *The paper characterizes the Romanian international tourism, during 1990-2003, formulating some statistical considerations about the specific indicators in correlation with other economic development indicators. After presenting the importance of tourism development and its socio-economic effects in the national economy, analyzed the tourism performances in Romania, in the chosen period, by different statistical analyses of the indicators' evolutions and there are correlations between them.*

Key words: *foreign arrivals, Romanian departures, overnight stays, average length of tourist staying, correlations.*
