

IDIOPATHIC PRECOCIOUS PUBERTY

Luminita BELDEAN*

Abstract: *In this article are two case presentations, respectively two girls with idiopathic precocious puberty. Both cases presented received treatment with GnRH analogue. The cases are a start point to discuss about diagnosis and treatment of puberty disorders. There are included data from literature about central precocious puberty and precocious thelarche. It is underlined the difficulty of diagnosis in the field of puberty disorder.*

Key words: *precocious puberty, features, tests, treatment*
