

SOME ASPECTS OF MEASURING THE SOCIO-ECONOMIC CHANGES IN THE NEW ECONOMY

Liliana DUGULEANĂ*

Abstract: *The paper presents the concept of New Economy and the main dimensions considered in building the specific indicators in correlation with the difficulties in measuring them, at local and aggregate level. Ensuring the comparability in international comparisons is also difficult. The paper also presents some statistics to emphasize the recently positive effects of the socio-economic changes in New Economy of OECD Countries.*

Key words: *New Economy, ICT indicators, international comparability.*
