

DATA MINING APPLICATIONS IN DIGITAL LIBRARY – BIBLIOMINING

Angela REPANOVICI **

Abstract: *From the point of view of terminology, “bibliometry” together with “data mining” generate “bibliomining”. Bibliometry is based on the exploitation of document – oriented scholastic communication. The analyses carried out in bibliometry are mostly resort to frequency, but also resort to visualization and data mining. User-oriented data mining is centered on Web pages accession by a certain user.*

Keywords: *bibliometry, data mining, bibliomining*
