

BIBLIOGRAPHICAL STUDY REGARDING THE PVA-H PRACTICABILITY IN BONES IMPLANTHOLOGY

G. MOISE¹ S. PAȚACHIA¹

***Abstract:** This is a study of the existent documentation regarding the application of the hydro-gels in the orthopedic surgery. The specialists in bone tissue engineering have developed until now several implant types made of resorbent polymeric skeletons that are supplementing or replacing with success tissues, articulations, tendons and ligaments that are broken or have different diseases.*

***Key words:** implant, poly(vinyl alcohol) hydrogel, polymeric skeleton.*
