COMPARISON OF FASTNESS OF THE CONVERGENCE AMONG KRASNOSELSKIJ ITERATIONS

Ovidiu POPESCU [1]

Abstract: *This paper presents a method on the seasonal adjustment of time series, denote X-12 ARIMA, developed by the U.S. Bureau of the Census, which is commonly used by many institutions. It is one of the most recent methods that use moving average filters.*

Key words: *Krasnoselskij iteration, Lipschitz strongly pseudocontractive map.*
