

SOLAR AND WIND POWER DETERMINATION FOR BRAȘOV CITY AREA

L. COSTE¹

E. EFTIMIE¹

Abstract: *This paper proposes a study concerning the availability of solar and wind power for Brașov city area. The meteorological data used have been recorded with a Delta-T weather station, over a time span of two years. The paper presents the conclusions derived from the comparative analysis of the values obtained for the solar and wind power.*

Key words: *solar power, wind power.*
