ALGORITHMS FOR MINIMUM FLOW. DYNAMIC TREE IMPLEMENTATIONS

Oana GEORGESCU [1]

Abstract

We present three algorithms for finding minimum flows in networks with arcs capacities using the dynamic tree implementation. Also, we present an example for one of these algorithms.

2000 *Mathematics Subject Classification:* 35B27, 35K57, 76R50.

Key words: network flow, network algorithms, minimum flow problem, dynamic tree.
