

DEVELOPING ORAL COMMUNICATION WITH ENGINEERING STUDENTS

Mihai ION¹

Abstract: *Due to an increasing globalisation tendency in trade, commerce and industry, engineering students need not only technical knowledge but also good English language skills. The present paper focuses on various activities and strategies for developing the students' oral skills. The didactic approach takes into consideration the particular needs of technically-inclined students.*

Key words: *EST (English for Science and Technology), engineering communication, oral presentation, role play, didactic approach*
